PROFESSIONAL SUMMARY

Motivated and focused Final-year ICT undergraduate with hands-on experience in the MERN stack (MongoDB, Express.js, React, Node.js) and Tailwind CSS. Proven ability to build functional, user-centric web applications through academic and personal projects. Eager to contribute to real-world development pipelines and learn from industry professionals.

EDUCATION

Bachelor of Information and Communication Technology (Hons)

Feb 2024 – Present

University of Vavuniya, Faculty of Technological Studies, Sri Lanka

TECHNICAL SKILLS

- **Programming Languages:** JavaScript (ES6+), Python
- **Frontend Development:** React, Next.js, HTML5, CSS3, Tailwind CSS
- **Backend Development:** Node.js, Express.js, RESTful APIs
- **Databases:** MongoDB, MongoDB Atlas, MySQL
- **Tools & Version Control:** Git, GitHub, VS Code

PROJECTS

Event Management & Ticketing Platform | [GitHub](#)

2026

- A secure event management and ticketing platform featuring role-based access for Admins, Organizers, and Customers.
- Architected secure Node/Express APIs, integrated JWT role authentication, and implemented strict .env security configurations.
- Utilized MongoDB, React, Vite, and integrated the Stripe API for secure, real-time ticket purchasing.

Automated Real Estate Management System | [GitHub](#)

2026

- Secure system for seamless property listing, live search, and dynamic multi-category filtering.
- Built the Admin Panel for full CRUD, integrated OpenStreetMap API for automated geocoding, and secured input handling.
- Utilized React, Node.js, and Express with MongoDB Aggregation Pipelines to fetch and sort live trending properties.

Library Locator System | [GitHub](#)

2026

- A full-stack web platform that provides a real-time cataloging and mapping system to help users effortlessly locate physical resources within a library.
- Engineered the end-to-end development, including the design of an interactive user interface, secure authentication flow, and backend logic.
- Utilized MERN Stack, Tailwind CSS, and JWT for secure access control.

Animal Rescue & Adoption Web Platform | [GitHub](#)

2026

- A MERN web app with secure login, real-time pet filtering, and WhatsApp/Call integration for direct adoptions.
- Developed the full end-to-end system including backend APIs and ownership-based post-deletion logic.

CERTIFICATIONS

- React Basics – Meta (Apr 2026) | [Verify](#)
- Frontend Development with React – Packt (May 2026) | [Verify](#)
- Backend Development and API Creation – Packt (Apr 2026) | [Verify](#)
- Learn Next.js – SCRIMBA (Jun 2026) | [Verify](#)
